Office Action Summary

Art Unit: 1711

DETAILED ACTION

1. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 14, it is unclear upon what basis the amounts defining I, II and A were determined.

In claims 1 and 14, it is unclear if or how the upper limit of component I limits the claimed subject matter given that it exceeds 100% by weight.

In claims 2-4, it is unclear whether the subject matter is referring to the polyester or to the polyamide.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-17 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 93/20147, WO 98/39388 or WO 97/15629.

Each of the cited references discloses compositions comprising a polyester/polyamide blend. The compositions disclosed by the references meet the requirements of the present claims both in terms of the types of materials added and their contents.
